CLARO Hollow wall/post block

Claro is a solution for those looking for **impressive and at the same time practical fencing concepts**. Blocks with a **surface with visible grain** are used to build fences of **simple forms**. They come in **2 sizes: 80x40x17.5 cm and 80x20x17.5 cm.** The large format makes the assembly of the fence fast, and the built elements are **stable and durable**.

Claro blocks are **characterized by their versatility.** They can be built-in around houses and gardens maintained in both **modern and more classic styles.** They make it possible to create **traditional fences** with low foundations, narrower posts with a span between them, the posts themselves or **less conventional ones**, with a fuller structure (high foundations or uniform walls). **Colours in shades of gray** allows to be matched with different colors dominating the surroundings of the house, and above all the shades of paving, slabs and decorative elements in the Bruk offer.

Recommendations and information:

Recommended **mounting of the foundation: "overlap"**. Installation of **"block above the block" only in the case of anchoring the blocks between themselves.** Hollow bricks can be installed **overlapping or one above the other.** The fence may only be built on a properly made **continuous foundation**. Use **dry pre-assembly.** Install with sealing glue. Moisten before filling with concrete. Pour concrete in 1-2 layers at a time. Install the anchors **in the concrete core**. **Remove any dirt** generated during mounting on an ongoing basis. If unevenness is found, grind the upper surface to ensure that the blocks adhere exactly to each other.

Intended for use **with CLARO caps.**

Production: made with the use of the one-ply technology

Attention: For technological reasons pallet's weight may change.

Shapes and dimensions

Product details

Number of elements in the system: 1

Appearance: smooth surface, 2 sizes

Designation: walls and pillars, flower beds, construction of the fence wall, construction of the fence posts

Material: vibro-pressed concrete
