

Claro Pot

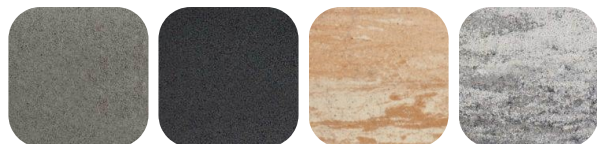

Looking for unique design and conscious use of space? CLARO pot provides ample opportunities for versatile arrangements in a modern style. It harmonizes perfectly with contemporary gardens or the surroundings of your home, whether it be as an eye-catching low wall, a minimalist or a unique flower bed.

To achieve a comprehensive spatial concept, consider integrating the Claro pot with other products that share a similar style and color scheme: Mega palisade and Claro fence.

Recommendations and information:

Development according to the best construction practices. When reinforcing slopes, additional layers are constructed with the pots shifted by half their width. For the construction of retaining walls taller than 1 meter, pots are used only as a lost formwork on the strip foundation with internal reinforcement and concrete filling. The concrete class, amount of reinforcement, and foundation bench must be specified in the technical design.

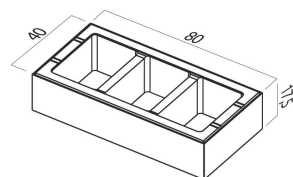

Bevel: micro dimension

Spacers: spacers-free; shape allows precise adjustment to each other

Joint width: joint-free

Production: made with the use of the one-ply technology

Shapes and dimensions
